

Assignment 1

1. Download on your computer and extract the content of the attached “Hospital supply chain.zip” file. You will find 2 CSV files:
 - Hospital supply chain (1).csv
 - Hospital supply chain (2).csv
2. On your computer, create a new Excel Workbook and save it under the name **FirstName_LastName_Assignment1.xlsx**.
3. In this workbook:
 - a. Import the file Hospital supply chain (1).csv. Use the **65001: Unicode (UTF-8)** as encoding style during the importation process.
 - b. Format the Date column using the following formatting style **yyyy-mm-dd**
4. Use the data validation functionality to make sure that:
 - i. The values of the Expense_Category column are restricted to only **Staffing, Supplies and Equipment**
 - ii. The values of the Description column are restricted to only **Surgical masks, Ventilators and Surgeons' salaries**
- b. Use the **Excel Data Entry Form** to enter in the previously created worksheet the 5 data points that are provided in the Hospital supply chain (2).csv file.
5. The data might have some duplication. Use the appropriate functionality to check and remove the duplicates, if any.
6. Convert the Amount column into Euro (€) with 2 decimals.
7. Use the conditional formatting functionality to apply the following formatting:
 - a. If the Amount is less than 4,000, the corresponding line should have a yellow background.
 - b. This formatting style has to be applied to the range A1:D501.
Hint: your rule formula should reference the cell #1 of the chosen column.
8. Sort the data by date, from the oldest to the newest expenditure.
9. Filter the data to have only the information for Surgical masks and Surgeons' salaries displayed.
10. Make sure the final data is filtered to show only the amounts that are less than 5,000 Euro.

Good luck!!
